BALANCE

pH DOWN

High pH will make water uncomfortable, lead to scale formation, and impacts the cleanliness of the water.

- 24 oz C002625-CS20B8 (12 /case)
- 3 lb C002625-CS20B4 (12 /case)

pH UP

- 2 lb C002729-CS20B2 (12 /case)

ALKALINITY INCREASER

Alkalinity helps keep pH in the ideal range. Even if pH is in range, low or high alkalinity can create havoc in water. Alkalinity doesn't change that often, so it only needs to be tested half as frequently as pH.

- 2 lb C002693-CS20B2 (12 /case)
